Product Designer · Design Engineer · AI Products · Design Systems · Visual Design · 5+ years

EXPERIENCE

Product Designer — Habit Coach AI, Inc.

Oct 2024 – Jan 2026

Consumer AI · Voice + Chat + Dashboard · 0 to 1 · San Francisco, CA

- Sole designer from day zero, owning the full product surface across conversational chat, adaptive voice interfaces, and a real-time cognitive dashboard — taking the product from concept to public beta with a 24% lift in onboarding conversion.
- Invented six distinct AI coach personalities, each built to surface the real need behind a user's message — designing context, memory, and personalization systems that adapted the coaching tone to each user's behavioral patterns over time.
- Built and owned the Figma design system from scratch with semantic design tokens, reusable components, and developer-ready handoff documentation, reducing engineering handoff time by 30%.
- Prototyped production-ready features directly in Cursor AI and Claude Code — establishing an AI-native workflow the broader team adopted and accelerating delivery without additional headcount.

Senior Visual Designer — ZS Associates, ZAIDYN Platform

Feb 2021 – Jul 2023

Enterprise AI · Global Biopharma · 130+ Fortune 500 Clients · Pune, India

- Led visual and UI design for a global AI-powered biopharma platform across 130+ Fortune 500 clients — crafting typography, color, iconography, and component design for 80+ user personas across web, tablet, and mobile.
- Invented the platform's tree dropdown component from scratch after identifying a critical visual pattern gap — adopted across the entire ZAIDYN product by teams in India, Europe, and the US.
- Built and scaled a Figma visual design system with semantic tokens, component libraries, and iconography standards used by a cross-functional global team across 20+ product surfaces.
- Introduced Visual Notes, a cross-team framework using annotated design artefacts that significantly reduced design-engineering misalignment during handoff — adopted as standard practice across the org.
- Mentored junior designers on visual craft, systems thinking, and AI workflow adoption while partnering with product and research on discovery.

Visual Designer — YUJ Designs

Nov 2019 – Jan 2021

UX Consultancy · TATA Motors · TATA Hitachi · Pune, India

- Designed visual identity systems and UI for TATA Motors' multilingual spare parts search with voice and AI-assisted image search — improving accessibility by 35% for 52,000 mechanics across global markets.
- Built a comprehensive visual design system and brand identity for TATA Hitachi defining typography, color, iconography, and component standards across their global machinery product line.
- Conducted field research and usability testing with mechanics in low-connectivity environments, translating insights into simplified visual hierarchies and iconography.

Co-Founder & Lead Designer — Reeb Inc.

May 2019 – Nov 2019

Design Studio · Consumer Products · Brand Strategy · Mumbai, India

- Co-founded a design studio; directed visual identity, branding, packaging, and UI for clients across fashion, textile, and e-commerce. Launched board game Halla Gulla on Amazon, selling 250+ units in 5 weeks.
- Designed the blockchain app UI and complete visual identity for Mynk, a project backed by Bollywood director Anurag Kashyap.

UI Designer — The Butterfly Effect Studio

Aug 2016 – May 2019

Digital Agency · Web & Brand Design · 20+ Clients · Mumbai, India

- Designed and shipped UI, branding, and front-end specifications for 20+ client websites across hospitality, fashion, and education — creating pitch decks, social graphics, event collateral, and email campaigns.
- Built marketing visual systems for Signature Shirts and Suryam Ethnic Wear, maintaining brand consistency across all digital and print channels.
